Securely Gathering and Organizing Your Information

With data volumes multiplying exponentially across a whole new range of mobile, social and IoT (Internet of Things) platforms and devices—getting answers is more challenging than ever. First you must collect the data and documents, protect them from intentional or accidental change and preserve them for future use in your case. And you must do this in the right way so that you avoid unnecessary cost and risk of possible sanction.

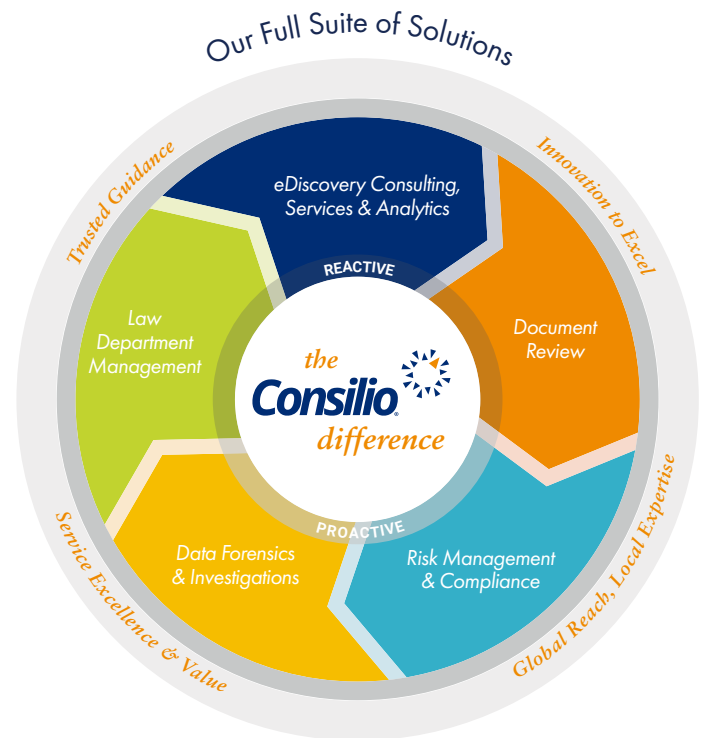

There isn't time for you to stay up-to-date on ever-evolving data platforms, or your IT team to do the same on defensible collection practices across multiple jurisdictions. Put simply, we are experts so you don't have to be.

Our expert advisors are available to assist you with tailored guidance for non-forensic collection of both ESI and paper, using the most stringent standards and appropriate technology.

Whether Electronic or Paper, Data Handling is Key

Electronic files can be collected by our staff, or yours, and sent to our data center for processing via sFTP, media (i.e. flash drive or DVD), overnight shipping or other bonded courier services.

Trained experts can also collect paper documents on-site. Each document is inventoried on a Detailed Collection Tracking form, a copy of which is maintained by the client and used at the time of return to insure that all material is in good order and accounted for.

Global Leader in Legal Consulting and Services

Our forensics data experts:

- Are recognized as leaders in their field—and considered critical assets by our clients.
- Have worked extensively with corporate attorneys, outside counsel, internal investigative staff, and law enforcement in hundreds of jurisdictions around the world. Some also hold government clearances.
- Represent a unique blend of experience and skill in information security, investigative techniques, forensic data analysis, jurisprudence and litigation support.
- Use our state-of-the-art, forensically sound and verifiable technology and techniques to identify, capture and preserve information via:
 - Physical or logical forensic imaging
 - Targeted, remote collection
 - Cross-verified collection of mobile devices and data from social media

When You Have More Than ESI: Paper Discovery Services

Document Photocopying & Related Services

- Black/white, color & oversize reproduction
- Document labeling
- Exhibit page labeling
- Remote location copying (on-site)
- Scanning (on-site)

Digital Prints

- Prints from various media and various file types, including TIFF, PDF & JPG
- File conversion to print
- Native file printing
- Document reconstruction

Document Scanning & Related Services

- Black/white, color & oversize documents
- Image numbering (EBS)
- Optical character recognition (OCR)
- Database Scanning Support
- LDD & coding services
- Remote location scanning (on-site)

Other Paper Related Services

- Trial board creation
- Witness and issue kit preparation
- Bindery services including GBC, Velo & Acco binds
- Duplication of Audio tape, VHS/DVD/CD and X-ray
