

Document Review Services

Expert, defensible review services that increase quality, efficiency and cost savings

- Reduce review expenditures, leveraging complex, proven workflows, analytics, and reporting
- Review and coding with a high level of accuracy and efficiency, across languages, matter types and industries
- Global reach provides in-region review infrastructure, talent, project expertise and best practices

Document review is the most expensive and time-consuming component of any eDiscovery exercise. Seventy-three percent of all eDiscovery expenses are related to review,¹ with larger and more varied data sets driving the price tag even higher. To combat the escalating expense of document review, corporations and their outside counsel seek approaches that lower costs without sacrificing quality, timeliness or defensibility.

Consilio meets these demands with three Document Review Services: Staffing, Coordinated Review, and Comprehensive Managed Review. Each option provides instant access to our global network of thousands of prescreened legal professionals as well as expert recruiters capable of quickly staffing the review with the right resources. Review location is flexible—clients can choose from any of our review centers, utilize their own space or opt to use an on-demand review center, a temporary location that meets the matter's requirements. Plus, clients can choose the amount of review oversight needed for the matter.

Staffing

Experienced Staff for Domestic or Global Projects

Clients manage their eDiscovery strategy, however, leave the responsibility of amassing a talented team of reviewers to Consilio. Whether the project is domestic or global, our expert recruiters can assemble a skilled team in as little as 24 hours, drawing from a pool of legal professionals with native fluency in more than 30 languages and experience across varied matter types and industries.

Coordinated

Recruiters and Coordinators to Maintain Quality and Review Control

With this solution, clients leverage the experience of expert recruiters and review coordinators while maintaining control over the review workflow. Tapping into Consilio's expert staff for guidance on best practices, consistent communication, customized reports on review progress and administration of quality control protocols, Coordinated Review offers flexible service options to fit any project budget.

Managed Review

A Complete Document Review Service Solution

Our Managed Review Services are designed to augment resources with the best experts, processes, and technology needed to achieve faster turnaround without sacrificing quality. Our review specialists are consultative guides, not just order takers and our document review managers - licensed attorneys and former litigators - supervise all resources and processes. We can quickly staff your project from our pool of highly qualified attorney reviewers and our review centers feature multiple layers of physical security to ensure maximum security and data privacy.

Case Study: Managed Review Helps Reduce Telecom Merger Review by 4 Weeks

Merger in highly regulated telecommunications industry involved requests from multiple agencies within tight timeframes. Our Managed Review team coordinated with two Amlaw 100 firms to simultaneously fulfill all requests and FCC filings in under nine weeks – four weeks ahead of schedule. This in turn helped the client save money, meet their regulatory obligations faster and successfully close their transaction.

Global Locations

Clients' matters cut across jurisdictions with different data privacy regulations, legal systems, languages, and security requirements, which is why our review centers are stationed strategically across the globe with in-region specialists with deep practical expertise operating in-region and across borders.

On-Demand Review Centers

In addition to our current locations, temporary review centers can be established anywhere in the world with the same strict security protocols and our multilingual team of global experts.

Secure Remote Review

Get the right documents in front of the right experts—regardless of location. Ask how our secure remote review solutions can enhance the efficiency and quality of your on-site, review center-based projects.
