

ECA, Analytics & Reporting

Leverage analytics, reporting and workflow techniques to efficiently focus downstream review.

- Invested in innovative, patent-pending technology and workflows
- Save valuable time and cost over brute force review or alternative corpus culling techniques
- Tools designed and built or specially-enhanced in-house to drive ECA / ICA workflows

More analytics in Relativity than the competition.

Experience resulting in better, more consistent outcomes.

consilio.com

PM.FS0025.20181029

Consilio continually invests in innovative, patent-pending technology and workflows around ECA and Analytics to streamline eDiscovery elements that have the most influence on downstream project costs and timelines. ECA and Analytics are so important to good case outcomes, we strongly suggest use on every matter we support.

ECA and Analytics Saves Time and Costs by

- Culling and grouping similar documents using near duplicate detection, email threading and custodian identification
- Searching, analyzing, culling and performing TAR on all data
- Uncovering the most relevant documents quickly with immediate availability for review

CASE STUDY:

Integrating Analytics Techniques Saves Clients \$3 Mil

Four million documents to be reviewed in 77 days with no effective search term filter due to case theory. Without advanced analytics, at a rate of 50 documents per hour, this would require 100 reviewers and 103 days at an estimated cost of \$3.69 million.

Using Structured Analytics, Conceptual Analytics and Predictive Coding, our company saved the client over \$3 million dollars in unnecessary review costs by:

- Reducing the review documents by over 40% using advanced analytics techniques
- Allowing for smaller, more efficient review team to address prioritized documents
- Providing critical time and cost savings; allowing reviewers to move toward next phase of privilege review more than a month ahead of schedule
- Providing defensible, repeatable process without inconsistency or errors

Our Technology Assisted Review (TAR) Expertise

- Early case assessment
- Review Prioritization
- Large datasets with small timelines
- Internal investigations
- Culling
- Opposing party productions
- Quality control and quality assurance
- Increasing speed and accuracy
- Predictive coding
- and more...
