

Global Infrastructure Security

Active, continual investments in client security & risk mitigation

- Complete suite of eDiscovery solutions physically located in certified and secure data centers
- Certified cybersecurity and data privacy experts audit, optimize and continuously protect your organization's data
- Regularly audited for security and penetration by client's and third-parties

Encryption

All data in motion, whether physical or virtual, is fully encrypted using SSL.

Physical and Electronic Security

Multiple layers of physical security— including guards, cameras and biometrics— restrict access to our facilities.

- Network perimeter controls identify and prevent network intrusion.
- Regular third-party penetration testing.

Our team takes our obligation to protect your privacy very seriously. Our protocols and practices, developed through years of experience and research, follow—and often exceed— international best practices for security of data, documents and work product. Our complete suite of eDiscovery and risk management solutions is physically located in multiple certified and secure data centers in the U.S. and the U.K.; the International Trade Administration recognizes our data centers as self-certified under EU-US Privacy Shield Principles. They are listed under the Privacy Shield List at www.privacyshield.gov.

Data Center Security Certifications

Our complete suite of eDiscovery solutions is physically located in certified and secure data centers.

Security Data Center Certifications

- | U.S. | U.K. |
|----------------|-------------|
| • SOC 2 Type 1 | • ISO 27001 |
| • SOC 2 Type 2 | IRL |
| • SOC 3 | • ISO 27001 |
| • ISO 27001 | |

Compliance Company Certifications

- | U.S. | U.K. |
|----------------|-------------|
| • PCI-DSS | • ISO 27001 |
| • SOC 2 Type 2 | IRL |
| • SOC 3 | • ISO 27001 |

Partner With Confidence

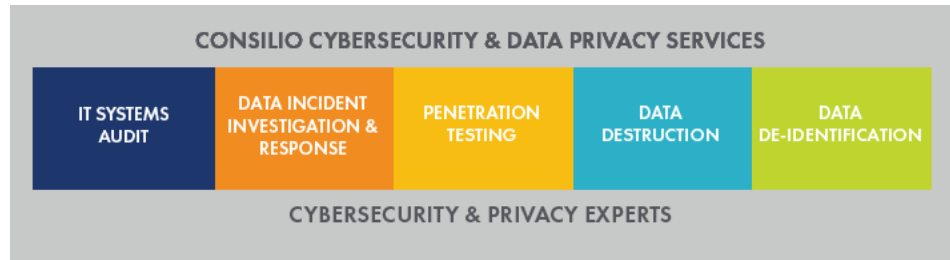

Our expert cybersecurity advisors can also assist you with information system security assessments to help you ensure that your own technical environment is as secure as possible, and that your staff are properly and thoroughly trained in appropriate protocols.

In the event of a data security incident, our experts can be on-the-job virtually within minutes—and physically onsite within 24 hours to assist with assessment and remediation.

Your Organization Must Be Prepared; We Can Help.

With threats such as ransomware, viruses and spear-phishing becoming all-too-frequent—and as the average cost of a data breach reaches millions of dollars per incident—your approach to cybersecurity must be thorough, enterprise-wide, and ever vigilant. Our team of certified cybersecurity and data privacy experts provides a full range of services to audit, optimize and continuously protect your organization’s data. In addition to your core IT operation, we also assess and protect you in the newest and fastest-growing risk areas, including the Internet of Things (IoT), Bring Your Own Device (BYOD) policies and management, and Remote Workforces.

Global Data Centers

North America

- Chicago, IL
- El Paso, TX
- Houston, TX
- Lenexa, KS
- New York, NY
- Phoenix, AZ
- Toronto, ONT

Europe

- Dublin, IR
- Frankfurt, DE
- London, UK
- Pairs, FR

Asia Pacific (APAC)

- Bangalore, IN
- Beijing, CN
- Hong Kong, CN
- Tokyo, JP
