Global Leader in Legal Consulting and Services

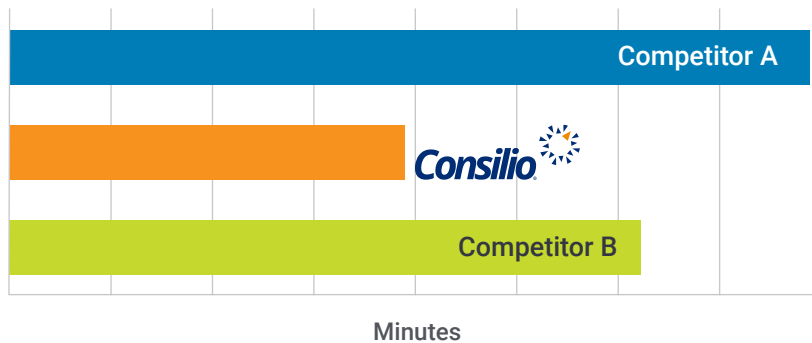

consilio.com

Our Intelligent Processing PlatformSM and Intelligent VaultSM streamline the elements of the eDiscovery process that have the most influence on downstream project costs and timelines. Comparisons show that our technology delivers 2X faster processing of full native file data sets vs. leading industry alternatives.

Better Technology Reduces Downstream Costs and Timelines

In addition to reducing processing time, you'll see hosting savings and quality improvements. By storing and syncing work product from multiple cases in the industry's most advanced multi-matter and single instance storage eDiscovery repository, you'll avoid redundancies, control costs and create fewer opportunities for error.

Number of Minutes to Process 60 GB Data Set (includes metadata, text, and natives for every document)

Consilio's processing and hosting are fully integrated—which means you benefit from time-saving, error-reducing interconnectivity between multiple industry-standard review platforms, including Relativity®, Ipro Eclipse, and any other SQL-based tools.

Exclusive eDiscovery Benchmarks

In addition to reducing processing time, you'll see hosting savings and quality improvements. By storing and syncing work product from multiple cases in the industry's most advanced multi-matter and single instance storage eDiscovery repository, you'll avoid redundancies, control costs and create fewer opportunities for error.

Why Choose Consilio?

A More Consultative Approach

Our specialists are guides, not order takers. We challenge assumptions based on experience and ask the right questions at the start to keep your review on track and on budget.

A Drive to Achieve Service Excellence

Our teams develop proven processes and patent-pending QC overview to deliver faster turnarounds without sacrificing quality.

Right Solution for the Right Results

With over 100+ software and database engineers on staff, we innovate to help our clients excel beyond the status quo from in-house platforms to enhancements of off-the-shelf solutions.

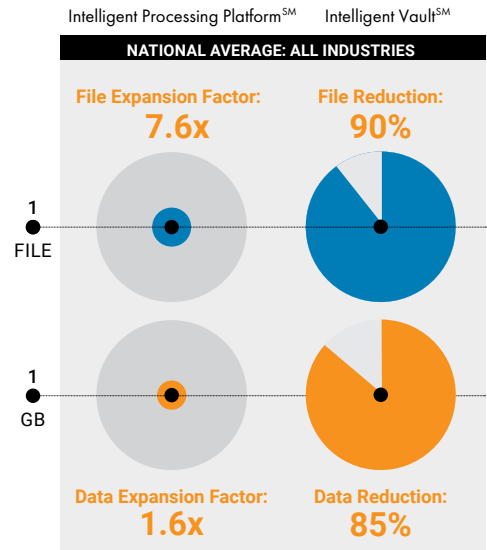

Together as One Global Practice

Through our expert advisors, technology infrastructure, matter expertise and proven workflows we offer our clients global reach and local expertise together.

About The Intelligent Processing Platform™

- **Real-time data uploading:** Customized ADD streaming directly to the Intelligent Vault™, Consilio's custom, single-instance storage data repository.
- **Optimization for full 100% native file processing** Higher quality de-duplication, extraction and filtering results.
- **Intelligence-prepped data:** Intelligent Processing means faster and more efficient ECA for quicker and more relevant analytics.
- **Scalable:** On-demand allocation of capacity, capable of satisfying all customer requests.
- **Highly secure:** Integrated into multiple SOC 2 Type II dedicated data centers.

About the Intelligent Vault

- **Single instance storage:** Automatically store and sync all activity and work product in one central repository to eliminate unnecessary data duplication and control storage costs across even when the same information is produced for different matters.
- **Rapid start on new matters:** On-demand hosting scalability for single and multi-matter management: Current implementation for client with over 600 new matters monthly.
- **Expedited ECA:** Analytics and reporting tools optimized by intelligence-prepped data and custom objects.
- **Flexible matter-specific security and accessibility:** Configurable for Dedicated, Designated and Shared SOC 2 Type II data center hosting environments; optimized for managed service solutions.
- **Architected for Re-use of Attorney Work Product:** Maintain and re-use work product, including responsive, non-responsive, privilege status and predictive and manual coding. Nearline data archiving of prior matters with on-demand reactivation.
- **Cross-matter metrics:** Centrally hosted multi-matter data repository integrated with Advanced Visibility® for custom dashboards and reporting.
- **Improved eDiscovery predictability:** Consistent processes, price, and data security protocols across multiple matters.
