Cross-border eDiscovery presents unique challenges which are difficult to overcome using traditional approaches. Increasing legal and regulatory scrutiny restricts the movement of data across jurisdictions. Data relevant to overseas proceedings requires nuanced techniques and expertise to collect, process, and manage this information in accordance to local laws. Corporate legal teams and outside counsel often require native language support and guidance when responding to discovery requirements in overseas jurisdictions, and typically are subjected to working under tight timelines. As a global leader in legal consulting and services, our worldwide team of professionals bring localized proven workflows, technology and expertise in solving these challenges.

North America

eDiscovery Consulting Services & Analytics –

With innovative pricing models, a global footprint and over a decade of experience across the eDiscovery lifecycle—from collections to hosting to processing to production—Consilio’s experts work with your team to develop the optimal solution, whether the matter is a small project local to the Asia Pacific region or large, complex and multi-jurisdictional.

Document Review Services – Each review is different. We help you deliver defensible productions by drawing from our best-practice workflows, rigorous quality assurance protocols, and innovative predicting coding models. Our team has specialized expertise supporting APAC review project and the unique requirements needed -- from complying with China’s state secrets laws to recruiting & training reviewers in native languages.

Data Forensics & Investigations – Consilio’s team of full-time, certified forensics advisors and investigators are experts in data acquisition, analysis and recovery, as well as collection and preservation of evidence—across all of the most widely used data types, sources, platforms, and devices.

Case Study: China / Japan Corporate Patent Dispute Filed In United States

Chinese electronics manufacturer was engaged in a patent dispute with a Japanese company filed in U.S. patent court. Consilio executed rolling on-site collections, including laptops, mobile devices with WeChat extraction and server data, processed and hosted the data in mainland China. Then after facilitating an in-country managed document review (including China state secrets review), the cleared data was then sent to the United States for production.
