Companies and law firms around the world are discovering and integrating the power of Microsoft 365 eDiscovery, Advanced eDiscovery and Compliance into their workflows. This evolution isn't without its challenges: from effectively training team members on new tool sets to overcoming latency and scalability issues. To help address these challenges, Consilio has been working side-by-side with clients integrating best practices, training and custom-designed support options with their Microsoft 365-driven workflows.

More Cost-Effective, Efficient Approach to eDiscovery and Compliance in 365

Consilio offers powerful options to legal teams seeking to better manage their Microsoft 365 workflows:

- **Manage Services for Microsoft 365 environments.** Manage your 365-powered workflow with a custom designed eDiscovery and Compliance solution providing continual or on-demand scalability, security, and efficiency at a predictable monthly cost.
- **Best Practice Consulting.** Assess current workflows and receive customized recommendations and best practices to improve eDiscovery and Compliance quality, speed, and efficiency.
- **Training & Education.** From team training sessions to best practice manuals or on-site / virtual, multi-day engagements, we design training & education programs with the goal of significantly boosting collaboration, process improvement, and risk mitigation.
- **Be supported by a world-class team.** From experienced project managers to 24 / 7 / 365 network operations teams, be supported by one of the largest legal consulting and service providers in the world with deep expertise in your industry vertical.

Simplified Microsoft 365 Program Process
