

Comparing Sightline & Concordance

Leverage ECA capabilities, linear review, and analytics in one modern eDiscovery platform.

- ▶ Leverage a best-in-class solution for all sizes of matters - from small investigations to large-scale, multi-year matters
- ▶ Get immediate results with self-service workspace provisioning, drag-and-drop data processing, review, and productions
- ▶ Customize and control work flows and workspaces based on your specific needs
- ▶ When needed, support your workflow with a trusted, experienced Project Management team

Sightline

Sightline is a fully-featured, secure end-to-end eDiscovery solution, allowing case teams to cull more, prioritize better and review faster at a lower, more predictable cost.

Inflexible workflows. Limited computing resources. Dated user experience. Difficulty coordinating projects amongst peers / other parties. Legacy desktop eDiscovery software presents many limitations when addressing today's eDiscovery projects and challenges.

Sightline is designed differently. By incorporating investigative tools, powerful capabilities to manage reviews, and integrating analytics throughout the eDiscovery workflow, Sightline is a best-in-class solution for all sizes of matters - from small employment matters to large-scale, multi-year matters.

Modern eDiscovery Capabilities for Today's Matters

Sightline offers a powerful suite of capabilities when compared to Concordance:

	 sightline <small>by Consilio</small>	Cloud9 Concordance®
Deployment & Support	Private ISO-certified secure data center; Distributed computing power; Full Project & software support	Local, single desktop machine; Software support only
