Staffed Review Professionals

With 73% of all eDiscovery costs attributed to review¹, document review is the most expensive and time-consuming component of any eDiscovery exercise. Larger data sets and more complex data types, like short-messaging and audio drive costs higher.

Consilio Complete Review meets these demands by blending our global network of in-region review experts, proven review workflows, flexible and secure technology infrastructure along with our network of thousands of screened legal professionals capable of quickly staffing the review with the right resources.

Clients, depending on their internal or legally-mandated requirements, can choose from any of our review centers or establish a temporary on-premise review center at any desired location. With over sixteen years of proven review management expertise over thousands of engagements, Consilio is consistently trusted to solve for the toughest review challenges and deliver.

The Complete Review Difference

- **Local review expertise** led by over 75 full-time managers. Our review managers have on average more than 8 years of experience managing document review projects with expertise to guide clients on best-in-class review workflows while meeting local requirements.
- **Specialized review solutions** offer tools & workflows that support audio or PII / privacy reviews, privileged log redaction, deposition preparation, audio, chat, foreign language or specialty industry expertise requirements.
- **Industry leading use of technology and analytics** to drive efficiency and consistently high quality work product while minimizing costs defensibly. Our experts consult clients and counsel teams to achieve proven results with technology enabled workflows.
- **Value-based Training & Collaboration Methodology** – We invest in a culture of continuous training and robust methodology for both our reviewers and review managers.
- **Innovative Quality Management Approach** which includes targeted re-review of documents and statistical sampling designed to achieve coding accuracy and consistency across the review population.
- **Performance transparency** delivered through strong collaboration with client and counsel teams and comprehensive reporting on review progress, productivity and quality.
- **Scalable review infrastructure designed from the ground up** for reviewer productivity and scale and able to cover the largest cases in all industries with review capabilities available in more than 20 countries worldwide. Industry-leading physical and data security at all review facilities.

Complete Review CASE STUDY

Wireless Telecom Saves Over \$800,000 in Costs Through Predictive Coding & Managed Review.

Client Challenge

Our client was overwhelmed by discovery requests that required broad, voluminous document collection and review. A balance between cost management and reasonable compliance became difficult due to:

- Rising costs associated with culling large volumes of documents.
- Tight discovery deadlines that required large numbers of eyes-on reviewers.
- In-house unfamiliarity with technology that could expedite or enhance processing, culling, and review of their large volume of data.

Consilio Response

With client and outside counsel collaboration we delivered technology and consulting services fueled by our analytics capabilities, which included:

- A combination of expert managed review with award-winning, technology-assisted review capabilities.
- Project and review management teams conducting a quick-turn manual review of custodians most likely to contain relevant data.
- Leveraging predictive coding technology to apply decisions from the initial manual review to the remaining documents in the population.

Results Achieved

- Reduced \$800,000 in costs through the elimination of ~700,000 documents from human review.
- Saved 40% of the total cost of review by assessing, installing, and maintaining an in-house, technology assisted review solution powered by secure technology hosting and review facilities.
