Key Sightline Features and Capabilities for Cyber Incident Response

With a customizable user experience, workflow automation and review productivity tools, Sightline is designed to help teams quickly identify and classify PII/PHI and meet obligations.

Process Matter Data Quickly
From direct connectors to drag-and-drop, choose the data collection / upload process that works for your team. Use cyber project templates to speed setups.

Customize your Review Experience for PII/PHI
Quickly spot PII by preloading your Sensitive Data Scan insights into fields and automatically highlighting PII in documents. To move even faster, leverage speed coding stamps, and a fully-customized review experience to only load the essential user interface elements to your review.

Find Efficiency Through Mass Review & Action
Leverage thumbnails for images to quickly scan documents and flag for PII. Apply automatic redactions en masse if needed to save time.

Assess and Plan Effectively with Sightline's Sensitive Data Scan
Identify and prioritize your review / QC work early in your cyber incident workflow with an assessment report generated by Consilio's market-leading Sensitive Data Scanning AI solution. Assess projected review costs as well as incident risks together with our Cyber Incident experts available to guide you.

Best-in-Class PII Data Handling
Specialized data handling makes Sightline a preferred tool for Cyber response workflows:

- **Automated linking of PII/PHI to individual entities directly in Sightline greatly improves review efficiency.**
- **Contextual proximity analysis and source verification increases accuracy of PII detection over traditional means.**
- **Customizable PII/PHI classes can locate client-specific private data (such as client account numbers).**
- **Widely supported and tested across US and non-US PII/PHI data classes.**
- **High-accuracy handling of semi-structured data (such as spreadsheets).**

Quickly Assign and Monitor Review Projects for Your Team
Quick batching of assignments allows you to stay ahead of the game by delegating review work to your team members in 3 easy clicks. Monitor your team's progress with review and overall progress reports.
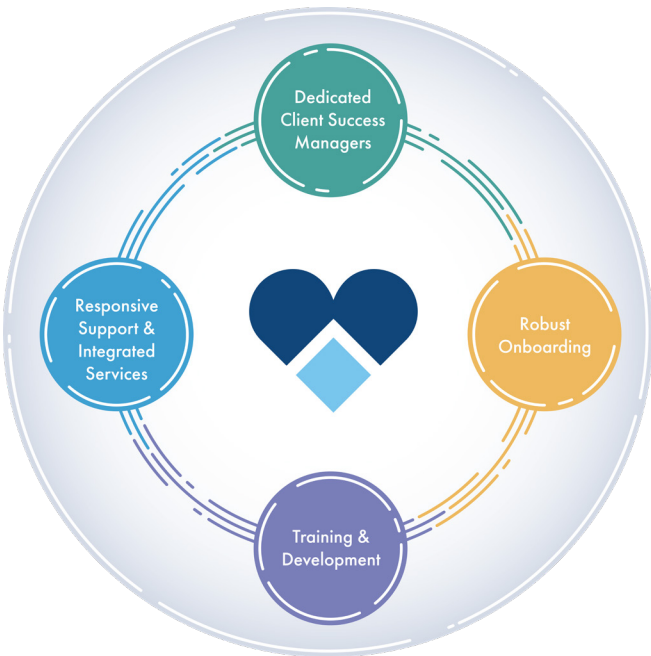

Leverage Automated Workflows to Reduce Time and Effort
Documents tagged a certain way can automatically be sent to special review batches. Automate batch printing & exports to move even faster.

Dedicated Client Success Managers

Responsive Support & Integrated Services

Robust Onboarding

Training & Development

Best-in-class service and support from the global leader in eDiscovery. When you choose Sightline by Consilio, you benefit from a strategic partner committed to your success with expertise solving for the toughest challenges. We do this by offering:

- **Seamlessly integrated support services including Cyber Incident experts** offer bandwidth – from data operations to document reviewers – available on demand with competitive pricing.
- **Dedicated Client Success Managers** support you as a client advocate from onboarding and training through maximizing your Sightline investment.
- **Sightline-certified Project Managers** working as experienced extensions of your own team – able to support you no matter the task.
- **Secure, private hosted infrastructure** provides peace of mind that you and your client's data are in good hands.
- **Self- or Full-service options** provide you with support flexibility across regions, matter types, or individual projects.

Trusted to Perform

Unlike other solutions, Sightline is hosted on Consilio's secured private hosted infrastructure and not on the public cloud. Trusted by over 4,000+ global corporations and law firms across the world, your client's data and experience is backed by dedicated teams of product, engineering, and security experts. Hosted on global environments including U.S. ITAR, Consilio successfully completes over 150 security audits annually for clients from financial services to bio / pharmaceutical – conforming to the strictest requirements.
