Consilio®

Beyond award-winning software, Sightline by Consilio is modern enterprise end-to-end discovery and legal hold by the global leader in legal solutions. With the rise of multimedia content – from Zoom video conference calls to dashcam recordings – the complexity and cost of effectively reviewing these sources has grown exponentially. Throughout the discovery process, Sightline is specifically designed to address these challenges. Throughout the discovery process from the processing of audio and video files to efficiently reviewing them, Sightline is specifically designed to address these challenges.

Key Sightline Features and Capabilities for Multimedia Review

With specialized processing, an enhanced multimedia review experience, and more, Sightline is designed to help teams quickly navigate the unique challenges posed by audio and video.

### Process Matter Data Quickly

From drag-and-drop to high-speed desktop client, choose the data collection / upload process that works for your team and the volume and types of files prevalent in your data set.

Proven Video & Audio Expertise

Consilio teams – from Project Managers to your Sightline Client Success Managers – have proven audio & video expertise to not only inform Sightline's platform design but also your support experience.

Proprietary Enhanced Search & Review Experience

Leverage proprietary tools to convert video into reviewable format with searchable audio tracks that can be searched – all deployed on specialty hardware needed for large-scale multimedia projects.

AI technology automatically identifies and redacts faces, people, license plates and vehicles for redaction.

Review interface features both video content as well as an audio waveform.

Play, pause, skip forward or back 10 seconds, skip to next or previous phonetic hit location

Review teams apply coding decisions through customizable coding forms.

Fully integrated Nexidia® phonetic searching shows the hit locations within the audio file

Automatically Identify & Redact Objects using AI

Automatically identify, track and redact faces, people, license plates, and vehicles – with a variety of available patterns (including mosaic, blur, outline, fill, and pixellate).

Quickly Assign and Monitor Review Projects for Your Team

Quick batching of assignments allows you to organize audio / review projects into a separate workflows / reviewers if needed.
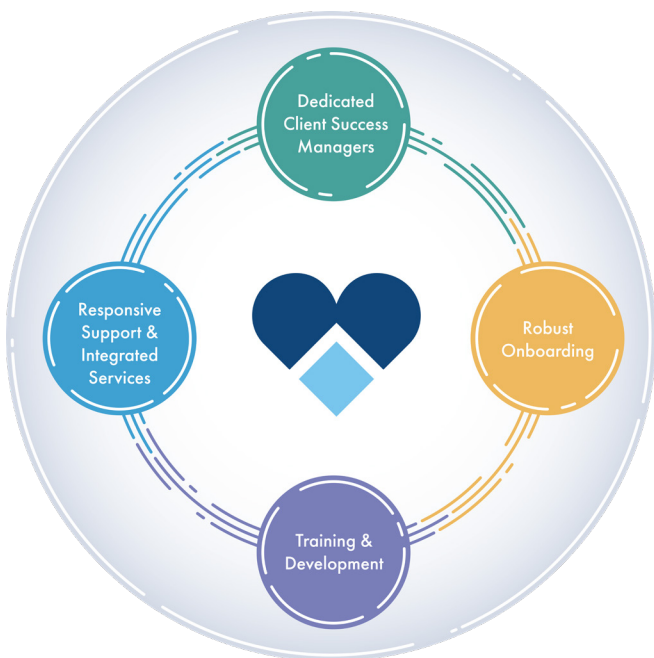

User-Friendly Review Experience

Sightline's review experience includes familiar player controls and audio waveforms so reviewers can easily visualize and navigate video and audio reviews effectively and efficiently.

Search Audio Content

Search audio content in video files to cull and prioritize your review so users can identify terms / phrases and review exactly where spoken. Apply audio redactions consisting of beeps, mute, or scrambled patterns.
